Other comments or suggestions:

!Due to problems with the upload of thesis to UIS, the oponent used a provided version of the thesis!

The Author investigates financials and value of IBM and comperes to other major IT company. The body of the work is extensive and the author's logic continuity deviates into interesting facts relating to the subject. Formatting of parts of text are not consistent. Methods used correspond to the analysis of such topics. Conclusion is short and would benefit by focusing on interpreting results. Also there is a lack of discussion.

Questions for thesis defence:

1. The author comments on growth during COVID. What does the author suggest to be the major contribution to this?

2 Can the author elaborate on his statement in the conclusion "As well as cutting cost on significantly overfunded initiatives like pension plan..."

 \mathcal{S} 1906
